CHRISTMAS RESIN COASTER

i BEGINNER

WHAT YOU'LL NEED

- Ribtex Clear UV Resin
- Ribtex UV Torch
- Crafters Choice Silicone Coaster Mould
- Ribtex Resin Mix ins such as sequins, scatters, glitter & beads
- Ribtex Gold Letters or Play Jewels
Alphabet beads to spell out your favorite Christmas slogan

INSTRUCTIONS

Step 1 - Safety first, use Ribtex UV Resin in a well-ventilated area and avoid contact with skin. Gloves are recommended.

Step 2 - Prepare your silicone mould for use, make sure it is clean and dry.

Step 3 - Pour a small amount of resin into the bottom of the mould.

Step 4 - Place any items you wish to embed into the resin into your mould.

Step 5 - Top up the mould with resin and ensure you pop any air bubbles that appear. Waving a heat gun or torch over the resin quickly will help bubble rise to the surface and pop easily.

Step 6 - Use UV light to cure your project, a UV torch is great for small projects otherwise direct sunlight will also cure your project.

Note: curing time depends on the size of your project and strength of UV light.

Step 7 - Once fully cured, the resin will be hard and not sticky. Remove the project from the silicone mould.

Step 8 - Smooth any rough edges with fine grit sandpaper.
