QUILT ASSEMBLY:

It's worth laying out your quilt on a designer board or your floor to see how it will all be placed together. *Tip take a photograph on your phone so you don't have any trouble putting the pieces back together in case the cat, dog or child runs over your carefully laid out quilt assembly.

Using your quarter inch foot start by sewing your triangles together and slowly assembling each block, and pressing out seams as you go.

I have divided the quilt top into 12 sections to be sewn first for easy assembly please see below. Happy Sewing Season!
