# SCULPEY CHRISTMAS TREE LUMINARIES

**e** EASY

## WHAT YOU'LL NEED

- Sculpey III White Clay 454g
- Sculpey Premo Mini Metal Cutters 12pc
- Sculpey Modelling Tools 4pc
- Template
- Baking paper
- Oven
- Emporium LED Tealight Candles 6pk

**Only use LED tealights not candle tealights as the Sculpey will burn.**

## INSTRUCTIONS

**Step 1** – Start by rolling out the white Sculpey into a large enough piece to fit your template and to a width of roughly 0.5mm thick.

**Step 2** – Lay the template on top of the Sculpey and cut around using the knife tool. Pull away the excess Sculpey and keep for the next tree.

**Step 3** – Use the mini star cutter to cut out star shapes from the Sculpey in a random pattern. Be careful not to cut any shapes out too close to the edge of the pattern.

**Step 4** – Carefully roll the Sculpey into the cone shape, overlapping the Sculpey along the straight edges. Use a rounded tool to blend the Sculpey together along the overlapping seam and create a strong join.

**Step 5** – Repeat this process to create multiple trees.

**Step 6** – When all your trees are complete, place some baking paper on a baking tray and carefully transition the trees onto it. Place another piece of baking paper over the top of the trees and place in the oven. Bake following the packet instructions.

**Step 7** – When the Sculpey is done, leave to cool before handling.

**Step 8** – To finish place your LED tea light inside.
